cryolite

Professional work at heights

# Employ specialists who will ensure professional, fast and safe execution of the contract.

At Cryolite, we have been providing comprehensive rope access services for 15 years.

**We work at heights:**
assembling, maintaining, securing, surveying,
as well as conducting dedicated training.

We perform specialized mountaineering work,
requiring the right approach, experience and equipment.
We ensure the full safety of machines, equipment, facilities,
and above all people.

## We perform

- Welding works
- Inspections of steel and concrete structures, and paint coatings
- Non-destructive testing
- Measurements of deviations and wear of structures in the form of expert opinions and photo-video studies

## We assemble

- Steel structures
- Lightning protection systems and electrical installations
- Photovoltaic installations
- Sound system, lighting and decoration

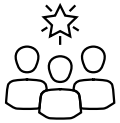
## We maintain

- Ropes, silos, boilers
- Other industrial installations
- We clean and protect against corrosion using hydrodynamic painting and sandblasting

## We secure

- Work of other specialists and equipment
- We train and supervise construction workers and OSH
- We conduct selection and inspection of equipment
- We develop safety plans and risk assessments

# We have:



## Extensive experience

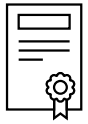
We have over 15 years of experience working at heights in difficult and challenging conditions. Our team consists of specialists: welders, fitters, electricians, technicians and rope access instructors. We have carried out hundreds of projects for several dozen companies both from Poland and abroad.

**We perform projects on time, safely and according to the assumptions.**

## Specialist equipment

In our work, we use only professional, and certified equipment adapted to the specific task. We purchase from specialist suppliers, and the execution of each project is preceded by a thorough and in-depth verification of machines, equipment and materials.

**Our objective is to achieve lasting and precise results.**



## Essential certificates

We ensure that our work is carried out in accordance with applicable laws. Our team is made up of certified specialists with, among others IRATA, VCA/SCC, OPITO, GWO.

We work in compliance with **IRATA** standard - a guarantee of skills, experience and safety.

**By establishing cooperation with Cryolite, you are working with a company that possesses the knowledge, skills and facilities to perform comprehensive works at heights.**
